PRINT PROVIDERS REFERENCE GUIDE

"Wear What You Think." — Powered by Printify's Global Print Network

About This Guide

Every product at ThinkWare Studio is fulfilled through **Printify's global network** of vetted print providers. Printify partners with over **90+ print facilities** across the US, Canada, UK, Europe, China, and Australia, giving our store access to competitive pricing, diverse product catalogs, and fast fulfillment. This reference document lists the key print providers in the Printify network, their locations, specialties, and typical production times.

How Printify Ranks Print Providers

Printify calculates a **ranking score** for each provider based on three factors: (1) **Product Reprint Ratio** — how often orders need to be redone due to quality issues; (2) **Delayed Production Time** — how consistently orders meet their stated production window; and (3) **User Appraisals** — feedback left by sellers after receiving sample orders. Higher-ranked providers consistently deliver on quality and speed, and are designated as *Printify Choice* partners.

Print Method Key

DTG	Direct-to-Garment — ink is printed directly onto fabric for vibrant, photo-quality results.
Sublimation	Dye-sublimation — ideal for all-over prints, mugs, and polyester products.
Embroidery	Stitched thread designs on caps, hoodies, and structured garments.
AOP	All-Over Print — full-coverage sublimation across the entire product surface.
Screen Print	Traditional screen printing for bold, limited-color designs at volume.

Printify Print Providers Directory

This list covers the major print providers available in the Printify network as of 2025. Actual availability per product may vary. Always check Printify's live catalog for the most up-to-date provider selection for your specific products.
